FOR IMMEDIATE RELEASE

Enhanced Systems is Recognized by Manufacturing Business Technology Magazine as a Process and Technology Innovator

Denver, Colorado, October 16, 2007

Enhanced Systems & Services, Inc.® (Denver, Colo.), developers of FINESSE™, the leading ERP software for project-oriented manufacturers, — today announced that it has been named by *Manufacturing Business Technology Magazine* as one of the Top 40 Emerging Software Companies for 2007.

Enhanced Systems was selected based on the following criteria:

- Identified a viable vertical industry niche and delivered the domain expertise needed to serve that industry;
- Formulated emerging software functionality for business and manufacturing process optimization;
- Distinguished themselves from the crowd of mainstream software vendors, for example, with their innovative use of infrastructure.

Enhanced Systems & Services, Inc. has been providing ERP solutions for project-oriented manufacturing since 1983. The privately held company's flagship product, Finesse, is targeted at organizations that manufacture capital equipment and other highly-engineered products. The leader in its market, Enhanced Systems & Services serves hundreds of customers across the globe in industries such as factory automation, aerospace and defense, transportation, energy and environmental products. Customers include GKN Aerospace, Ebara Technologies, Halter Marine, Teleflex, KHS Klockner and many other companies that require a project-oriented, enterprise-wide business application suite. For more information, call 303-425-1237 or visit the company's website at www.essfinesse.com.
